

ContentGenerator.net allows anyone to generate their own customised Flash games and activities.

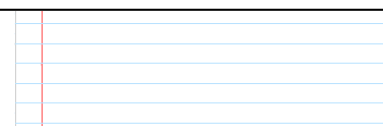

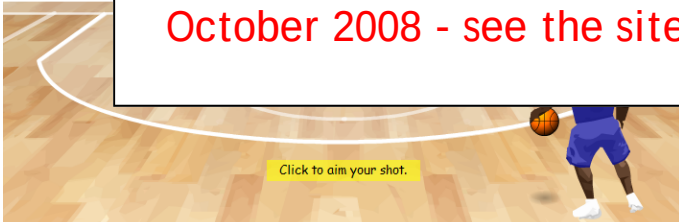

We have created this site to allow others to use the technology we developed for SchoolHistory.co.uk and ReviseICT.co.uk

With both free and reasonably priced pay-for programs, there are over 14,000 users. New updates have added SCORM functionality and the ability to embed into any VLE at no additional cost.

The activities have been created to grab attention and enthuse students, encouraging the effective use of ICT. Try the free programs to see and contact us should you wish to know more.

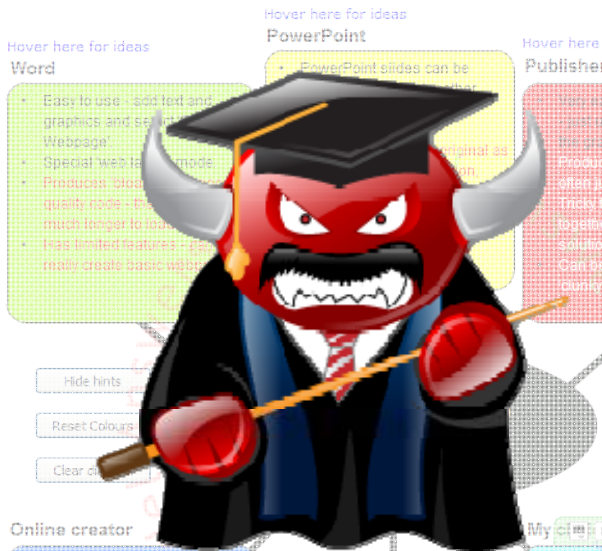

ContentGenerator.net

October 2008 - see the site for further details

Analysis of website creation software

Put together your own diagram covering the different webdesign programmes!

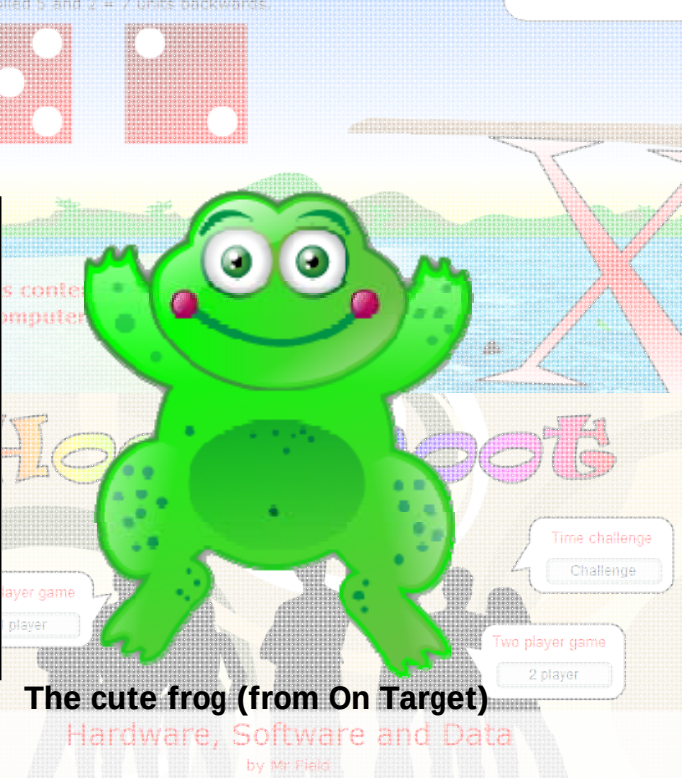

You've produced a brilliant range of brilliantly easy to use brilliant software. Brilliant!

Dave Stacey

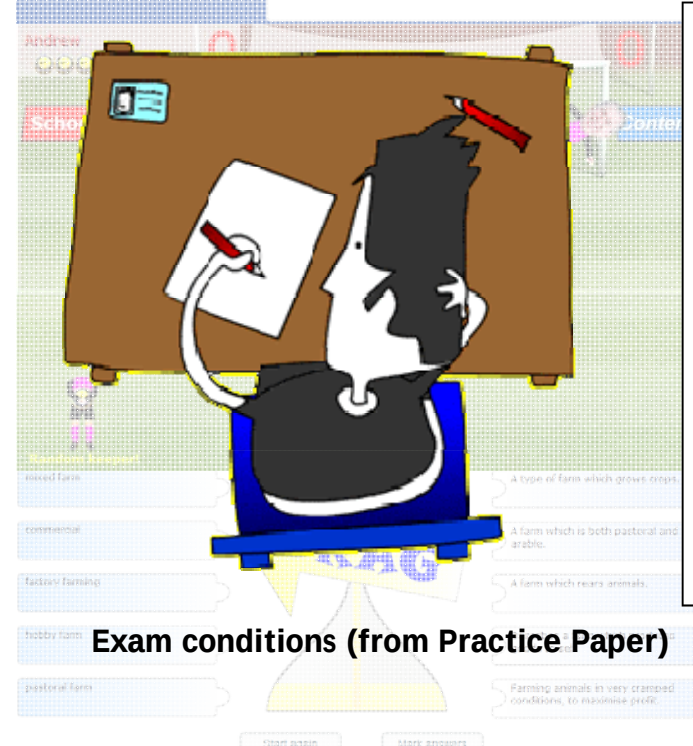

The Head (from Teacher Invaders)

I'm very impressed with your software - it's so easy to create engaging quizzes that the students love.

Adrian Murray

The cute frog (from On Target)

Exam conditions (from Practice Paper)

I would like to thank you for making this available - the students have been amazed and the other staff have been wondering what all the cheering has been about!

Nick Dennis
